

Advaith Bhushan

Primary 6 - Montfort Junior School

Math-first, STEM-curious learner with sustained Math and Science evidence, school recognition, and growing interest in problem-solving beyond classroom questions.

I like hard problems because they teach me how to think.

My name is Advaith Bhushan. I am building this portfolio to show my interest in Mathematics, Science, problem-solving, and research-style learning. I hope to grow in an environment where I can experiment, explore and excel with other students who enjoy asking difficult questions.

2024-2026 Sustained award history	10 Selected evidence items	Math Core strength	STEM Science breadth
---	--------------------------------------	------------------------------	--------------------------------

Fit with how I learn

Problem-solving and reasoning

I enjoy Math most when I have to test ideas, spot patterns, and explain why a method works. My competition journey has helped me become more patient with non-routine problems.

Research-style curiosity

NUS High's research and innovation culture interests me because I want to learn how to move from solving given questions to asking my own questions.

Math + Science breadth

Math is my strongest area, but my Science achievements show that I am interested in applying logical thinking across different STEM areas.

Student memory

A question I still remember is from the first round of NMOS 2019, specifically Question No. 29, which is about number puzzles. It still feels like the kinds of number puzzles I enjoy solving today because puzzles like these stretch my brain and allow me to map out different scenarios.

My 3-year learning journey

2024

First competitive exposure and early confidence

- Took part in the Raffles Mathematical Olympiad 2024, my first competitive exam of any kind, and received a Certificate of Distinction in Round 1 Junior Category.
- Built confidence through Math and Science competitions.
- Learned that Olympiad questions require creativity, not memorisation.
- Started seeing Math as a way to reason, not just calculate.

2025

Consistency and school recognition

- Growing fondness for Math - more like playing games than solving problems.
- Received school recognition for Mathematics.
- Inducted into IJHS, strengthening the story of consistency and leadership potential.

2026

P6 readiness and stronger results

- Achieved Silver in SASMO 2026.
- Added current-year Math and Science competition evidence.
- Preparing to explain not only what I won, but what I learned.

Selected achievements

These selected achievements show the full arc: first competitive spark, current Math strength, sustained effort, STEM breadth, school recognition, and leadership potential.

Raffles Mathematical Olympiad Distinction Math - 2024 First Competitive Exam Certificate of Distinction in Round 1 Junior Category of the Raffles Mathematical Olympiad 2024. This was my first competitive exam and helped spark my interest in Mathematics. Reflection: This was the first time I saw how exciting competitive Math could feel. It made me want to try more Math challenges and keep improving.	SASMO Silver Math - 2026 Selected evidence Current Grade 6 Math Olympiad evidence and one of my strongest recent achievements. Reflection: It takes more than memorization to solve Olympiad questions. I need to understand the underlying concepts and practise applying them in different ways.
P5 Best in Mathematics School - 2025 Academic Strength School-level recognition showing consistent academic strength in Mathematics. Reflection: This reminded me that steady effort in school matters as much as competitions.	SIMOC Math Olympiad Silver Math - 2025 Sustained Effort External Math competition evidence showing sustained challenge-seeking. Reflection: Different problems need different strategies. I learned not to use the same method every time.
World Math Competition Silver Math - 2026 Current Year Current-year Math evidence supporting the problem-solving profile. Reflection: I learned to check my logic before rushing to the final answer.	World Science Competition Silver Science - 2026 STEM Breadth Science breadth that supports a fuller STEM profile for NUS High. Reflection: Science also needs logic, observation, and clear explanation.
STEAM AHEAD - Science Olympiad Gold Science - 2024 Gold Award Strong Science evidence that complements Math achievements. Reflection: Science questions become easier when I understand the concept clearly.	IJHS Induction Leadership - 2025 Consistency Recognition of consistency, academic effort, and leadership potential. Reflection: Leadership starts with being responsible, consistent, and willing to contribute.

SIMOC Math Warriors Outstanding

Math - 2024 | Distinctive Award

Distinctive achievement that can support problem-solving and teamwork.

Reflection: Teamwork and clear thinking are important in Math challenges.

NMOS Honourable Mention

Math - 2025 | Singapore Signal

Local Math Olympiad-style experience and useful Singapore Math signal.

Reflection: Difficult papers teach me where I need to improve.

My story

"I do not only want to be fast at Math. I want to become better at noticing patterns, defending my thinking and logic, learning from questions I could not solve at first, and applying ideas to the real world."

Mathematics became my point of interest because the best questions have, time and again, not shown the answer immediately. My first competitive exam was the Raffles Mathematical Olympiad 2024, where I received a Certificate of Distinction. That experience made me more curious about challenging Math problems and encouraged me to continue trying other competitions.

I try one method, check if it works, and sometimes need to start again, especially in cryptarithms. Competitions have taught me several times that being stuck is part of learning and that writing down my thoughts is crucial to solve questions quickly and accurately.

Over the last few years, I have joined many Math and Science competitions that helped me practise patience, accuracy, and creative thinking. I am proud of my awards, but I also know that the most important part is how I improve and learn after each competition. It shows my dedication towards seeking knowledge and striving for better results and awards.

HOW I LEARN

What my achievements have taught me

When I am stuck

I try to redraw the problem, test smaller cases, look for patterns, or explain the question in my own words before trying again.

When I make mistakes

I check whether the mistake came from rushing, misunderstanding the question, or using the wrong strategy. This helps me improve my next attempt.

When I learn with others

I want to become better at explaining my thinking, listening to other methods, and learning how different students approach the same question.

Certificate gallery and proof points

Evidence	Year	Portfolio role
Raffles Mathematical Olympiad 2024 - Certificate of Distinction	2024	First competitive exam and spark for Math interest.
SASMO Silver Award - Grade 6	2026	Hero achievement for NUS High Math talent evidence.
P5 Best in Mathematics	2025	School validation of Math strength and consistency.
SIMOC Math Olympiad Silver 2025	2025	Sustained Math competition track record.
World Math Competition 2026 - Silver Award	2026	Current-year Math problem-solving evidence.
World Science Competition 2026 - Silver Award	2026	Science breadth for STEM profile.
STEAM AHEAD - Science Olympiad Gold 2024	2024	Strong Science evidence to complement Math.
IJHS Induction 2025	2025	Consistency, academic recognition, and leadership potential.
SIMOC Math Warriors Outstanding 2024	2024	Distinctive Math evidence supporting problem-solving and teamwork.
NMOS Honourable Mention 2025	2025	Local Math Olympiad-style experience and Singapore Math signal.

Certificate Annex

Advaith Bhushan - NUS High DSA STEM Portfolio

10 supporting certificate images follow, in portfolio order.

Certificate of Distinction

This is awarded to

ADVAITH BHUSHAN
MONTFORT JUNIOR SCHOOL

for achieving a distinction in the
Round 1 Junior Category

Raffles Mathematical Olympiad 2024

Aaron Loh
Principal, Raffles Institution

TOFFS Technologies
where speed and security matters
in partnership with
Toffs Technologies

Certificate Annex - 02: SASMO Silver Award - Grade 6

Index Number 065261003440
Certificate Number A0807934
Country and Territory Singapore

SASMO
Singapore & Asian Schools
Math Olympiad
SILVER AWARD

Scan here for your
Performance Report

This Award is presented to

ADVAITH BHUSHAN
from MONTFORT JUNIOR SCHOOL

for outstanding achievement in Grade 6, Singapore & Asian Schools Math Olympiad 2026

Henry Ong
President
SASMO

Dr Joseph Yeo B. W.
Advisory Board
SASMO

This e-certificate is only valid for the year of competition
Candidate should use physical certificate subsequently

Certificate Annex - 03: P5 Best in Mathematics

Certificate Annex - 04: SIMOC Math Olympiad Silver 2025

THE WORLD CONTESTS
(PRESTIGIOUS INTERNATIONAL COMPETITIONS)

This is to certify that

ADVAITH BHUSHAN
of **MONTFORT JUNIOR SCHOOL**

is conferred the

SILVER AWARD

WORLD SCIENCE COMPETITION 2026

Mr. Wang Weilong
Director, TWC

1ST MAY 2026

Date

Certificate Annex - 07: STEAM AHEAD - Science Olympiad Gold 2024

Certificate Annex - 08: IJHS Induction 2025

Certificate Annex - 09: SIMOC Math Warriors Outstanding 2024

Certificate Annex - 10: NMOS Honourable Mention 2025
